

Locking Bar Guides
For Model 2 Electric Interlocking Machines

Model 2 Electric Interlocking Machines

Locking Bar Guides

NOTE: The parts illustrated on opposite page are for use on Model 2 Electric Interlocking Machines with original form of locking (two locking bars to a slot). To avoid error, it is recommended that name and location of plant for which material is required by shown on order.

See Plates G0805 and G0810 for modified locking.

Drawing references are shown for convenience in checking shipping lists and invoices.
