- K - WITH 110 VOLT MECHANISM

One Arm Lower Quadrant Ground Signals

**One Arm and High One Arm  
Lower Quadrant Ground Signals  
Model 2A Top of Mast Mechanism**

Unless otherwise specified, signals will be furnished as illustrated on opposite page. Lamp, number plate and foundation are not included. If signals other than those shown are desired, specify height to center of blade and give reference numbers to spectacle and blade; also state number and color of roundels. See Part 18 of this Section for spectacles, blades and roundels and Part 17 for masts, ladders, bearings, etc.

Circuit controllers are equipped with the contacts necessary for the local control of the signal only. If pole changing contacts or extra drag contacts are required, same must be specified. State the positions of the signal blade at which each extra contact is to make and break, considering the stop position as 0 degree.
