

One Arm Upper Quadrant Suspended Signals

**One Arm**  
**Upper Quadrant Suspended Signals**  
**Model 2A Mechanism**

Unless otherwise specified, signal will be furnished as illustrated on opposite page. Lamp and number plate are not included. If signal other than that shown is desired, give reference numbers to spectacle and blade; also state number and color of roundels. See Part 18 of this Section for spectacles, blades and roundels and Part 17 for masts, ladders, bearings, etc.

Circuit controllers are equipped with the contacts necessary for the local control of the signal only. If pole changing contacts or extra drag contacts are required, same must be specified. State the positions of the signal blade at which each extra contact is to make and break, considering the stop position as 0 degree.
