- A - WITH 8 VOLT MECHANISM
- B - WITH 10 VOLT MECHANISM
- C - WITH 20 VOLT MECHANISM

One Arm Lower Quadrant Bracket or Bridge Signals

March 1916

**GENERAL RAILWAY SIGNAL COMPANY**

One Arm  
**Lower Quadrant Bracket or Bridge Signal**  
 Model 2A Base of Mast Mechanism

Unless otherwise specified signal will be furnished as illustrated on opposite page. Lamp and number plate are not included. If signal other than that shown is desired, specify height to center of blade and give reference numbers to spectacle and blade; also state number and color of roundels. See Part 18 of this Section for spectacles, blades and roundels and Part 17 for masts, ladders, bearings etc. See Plate H0301 for dolls.

Circuit controller is equipped with the contacts necessary for the local control of the signal only. If pole changing contacts or extra drag contacts are required same must be specified. State the positions of the signal blade at which each extra contact is to make and break, considering the stop position as 0 degree.

Drawing references are shown for convenience in checking shipping lists and invoices.

Fig. No.	Name	Drawing Reference
<b>Order by plate, figure number and name</b>
